

# Statement of Non-Accessibility

## Website accessibility status

Green Media Lab SRL SB is committed to ensuring the accessibility of its digital services, in compliance with the Directive (UE) 2019/882 (European Accessibility Act) and the international guidelines WCAG 2.1 - level AA.

Currently, the website **is not fully compliant with the accessibility criteria** set forth in the aforementioned regulations.

---

## Reasons for non-compliance

The website currently online has several critical accessibility issues, including:

- Suboptimal keyboard navigation;
- Absence of alternative texts for some images;
- Insufficient colour contrasts;
- Forms and buttons lacking accessible labels;
- Code structure not fully compatible with assistive technologies.

These nonconformities are due to the fact that the site was designed before the current accessibility regulations came into the effect.

---

## Adaptation plan

The current site has not undergone any substantial changes after June 28, 2025, the date when it became mandatory to ensure compliance for digital services for consumers according to European regulations.

A complete website makeover process has already been initiated, including:

- The design and development according to WCAG 2.1 level AA criteria;
- The adoption of accessibility verification practices and tools

The new accessible version of the website will be online **by September 2025**.

---

### **Reports of inaccessibility**

We invite users to report any difficulties in accessing site content by writing to:

**Email:** [info@greenmedialab.com](mailto:info@greenmedialab.com)

**Phone:** +39 02 9132 0415

Reports should include, if possible, a description of the problem, the address of the page and the device/ browser used.

---

### **Date of statement**

This statement was prepared and published on **June 28, 2025**.
